PROFESSIONAL SUMMARY

Data Quality Engineer with 4+ years of experience supporting enterprise-scale banking data platforms. Experienced in SQL, Python, PySpark, Hive, HDFS, Azure Data Factory and Azure Databricks with expertise in ETL validation, data quality automation, cloud migration, and large-scale financial datasets. Developed reusable validation frameworks that reduced manual effort by 50%, improved testing coverage across multiple ingestion pipelines, and supported critical analytics, reporting, and risk management platforms.

TECHNICAL EXPERTISE

- **Programming:** SQL, Python, PySpark
- **Cloud & Data Platforms:** Azure Data Factory, Azure Databricks, ADLS, Azure SQL, Delta Lake
- **Big Data Technologies:** Apache Spark, PySpark, Hive, HDFS
- **Data Engineering:** ETL Validation, Data Migration, Data Transformation Validation
- **Data Quality & Testing:** Source-to-Target Validation, Schema Validation, Data Reconciliation, Pipeline Testing, PyTest
- **Data Governance & Controls:** Data Governance, Data Quality Controls, PII Compliance, Audit Validation
- **Databases:** Oracle, MySQL
- **Data Formats:** Parquet, JSON, CSV
- **Tools:** Git, Jira, HP ALM

EXPERIENCE

- **TCS Canada / Client: CIBC** Feb 2022 – Present
Data Quality Engineer — ETL Validation Engineer *Toronto, ON, Canada*
 - Designed and implemented SQL, Python, and PySpark-based data validation frameworks within Azure Databricks to reconcile source-to-target datasets, improving data accuracy and reducing downstream defects.
 - Developed reusable automation utilities for schema validation, datatype verification, anomaly detection, and data reconciliation across 15+ datasets, reducing manual validation effort by 50
 - Validated end-to-end ETL workflows across Azure Data Factory, Azure Databricks, Spark, Hive, and HDFS environments, ensuring accurate implementation of transformation logic and business requirements across enterprise data pipelines.
 - Performed impact assessments and risk-based validation for platform and vendor changes affecting 100+ downstream reporting and analytics assets, supporting defect triage, sprint delivery and release readiness decisions within Agile development cycles.
 - Coordinated testing and validation activities across onshore and offshore teams supporting multiple concurrent data platform initiatives, participating in sprint planning, backlog refinement and release activities to ensure delivery alignment with business objectives.

- Performed large-scale data reconciliation and validation across multi-million-record financial datasets using SQL and PySpark, ensuring data completeness, consistency, and accuracy throughout cloud migration and data modernization initiatives.
- Validated and reconciled multi-million-record financial datasets during enterprise cloud migration initiatives, ensuring data completeness, consistency, accuracy, and PII compliance across enterprise data platforms.

MAJOR PROJECTS

- **Cloud Data Migration & Consumption**
 - Supported migration of large-scale financial datasets from legacy platforms to Azure Databricks using SQL and PySpark-based validation and reconciliation frameworks.
 - Analyzed and resolved data inconsistencies across multi-million-record datasets, improving downstream reporting and analytics accuracy.
- **AI/ML Data Personalization Platform**
 - Validated role-based data access controls and end-to-end data flows supporting AI/ML personalization use cases.
 - Developed SQL and Python-based validation rules to enforce data privacy, governance, and security requirements.
- **Risk & Fraud Analytics**
 - Validated SQL-based fraud detection and credit risk rules by analyzing transaction patterns and verifying business rule implementation.
 - Performed data quality assessments on datasets supporting ATM forecasting, mortgage affordability, and financial monitoring solutions.

EDUCATION

University of Windsor — Windsor, ON, Canada Master of Engineering (M.Eng.), Electrical and Computer Engineering August 2021

Gujarat Technological University — Ahmadabad, India Bachelor of Technology (B.Tech.), Information Technology March 2019
